## ECOBOILER T10

MARCO

### Automatic Water Boiler

A highly efficient hot water boiler that provides a constant supply of boiling water. Compact and low noise, this boiler is ideal for locations with limited space.

Powerful and reliable, the Marco Ecoboiler T10 provides up to 10-litres of boiling water at a time, which is drawn automatically from the mains water supply. Operated via an electrical control panel on the front of the machine, you can precisely adjust the temperature for specialist applications. Compact and stylish, this boiler looks at home in both back of house and front of house environments, including cafés, canteens and coffee shops.

LIQUIDLINE®

### ENERGY EFFICIENT

Crafted from 95% recycled material, featuring an energy efficient heating system and an insulated tank, this boiler is both sustainable and eco-friendly.

### EASY CLEANING & DESCALING

The Marco Ecoboiler T10 is just as easy to maintain as your home kettle. Simply clean the exterior regularly with hot soapy water and descale when required using a descaling solution or powder.

### TOUCHLESS OPTION

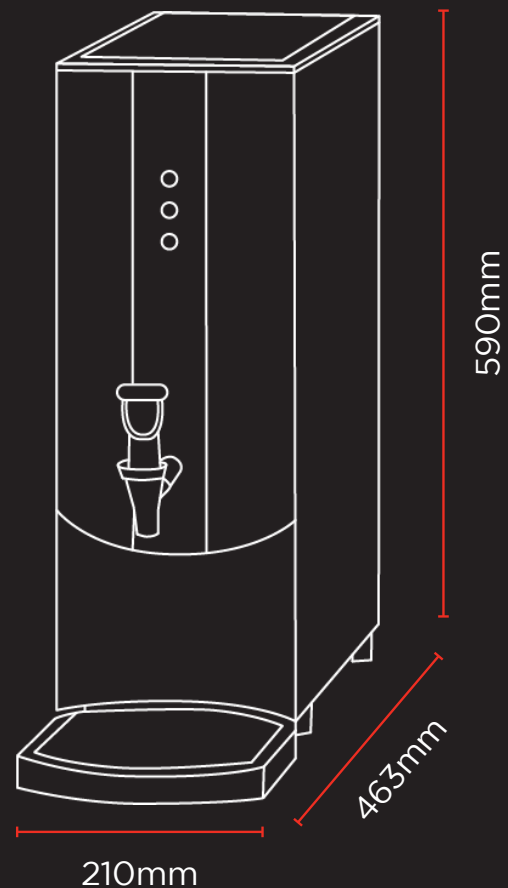

For added peace of mind, the Marco Ecoboiler T10 is compatible with an optional hands-free adapter, allowing you to dispense boiling water by just pushing a cup against the handle.
