ECOBOILER T5 MARCO

Automatic Water Boiler

Secure a constant supply of boiling water with this highly efficient hot water boiler. Ideal for smaller commercial environments.

A reliable and powerful boiling water solution, the Marco Ecoboiler T5 provides up to 5-litres of boiling water at a time. Automatically drawn from the mains water supply, this solution works hard in the background, offering maximum convenience. For specialist application, adjust the temperature of the water via the electrical control panel on the front of the machine. The Ecoboiler T5 is extremely compact and low noise for minimal disruption.

LIQUIDLINE®

ENERGY EFFICIENT

The Ecoboiler T5 offers an eco-friendly and sustainable water heating solution. Manufactured from 95% recycled material and featuring an insulated tank to preserve heat.

EASY CLEANING & DESCALING

Maintaining the Marco Ecoboiler T5 is extremely straightforward. The exterior of the machine can be simply wiped down with a warm soapy cloth to keep clean. Descaling is also uncomplicated when using a descaling solution or powder.

TOUCHLESS OPTION

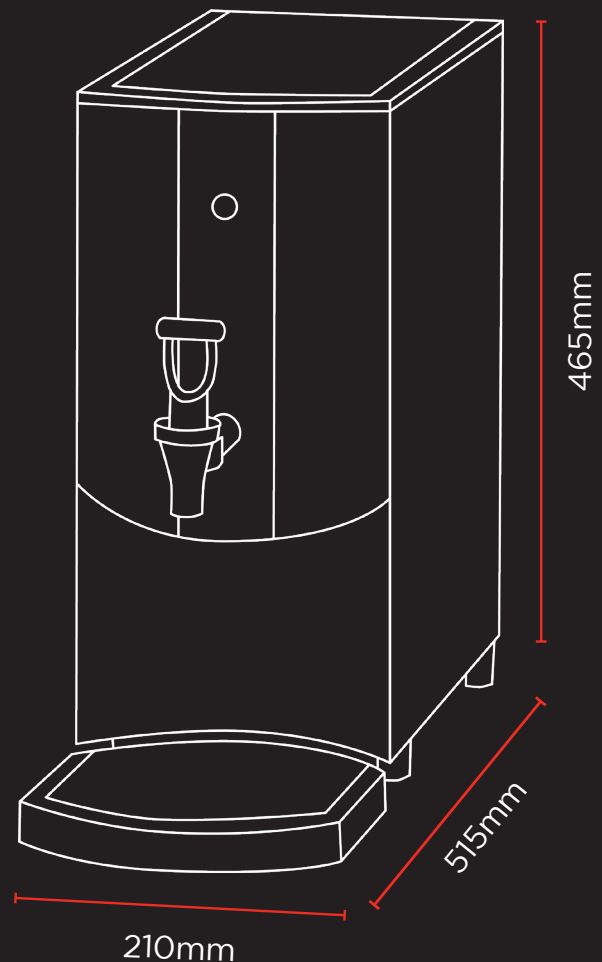

The Marco Ecoboiler T5 is compatible with an optional hands-free adapter that allows you to simply push your cup against the handle to dispense boiling water totally hands-free.
