## FONTEMAGNA VENDING

### ANTI-VANDAL, LOW WATT BUTTONS

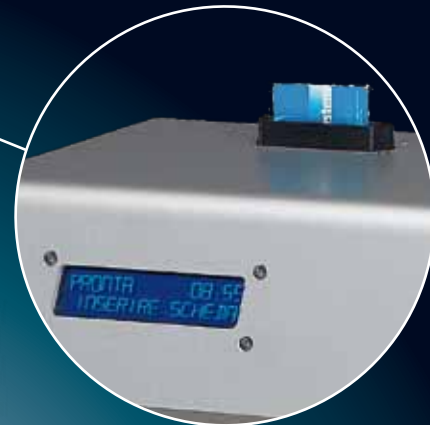

The stainless steel buttons used to select either cold still or cold sparkling water are programmable to supply specific portion of water.

**150**  
lt/h

Supplies 150litres/hour of cold still and cold sparkling water

Curved stainless steel

### CONTROL CENTRE WITH ELECTRONIC DISPLAY AND MAGNETIC CARD READER

A microprocessor controls the supply system, the correct functioning of the machine, litres supplied and remaining credit on the card. It also indicates the type of water that has been selected and its availability. The user control panel is clear and simple to use.

Works with  
personalized  
magnetic cards

Single dispensing  
point

Natural gas  
refrigerant

**GAS**  
**R290**

The new professional crossover between  
a water cooler and a vending machine
