

K2 Fresh Milk

Bean to Cup Machine

Introducing the K2FM, a high-capacity, dual hopper bean-to-cup coffee machine designed for fresh milk beverages. This machine provides users with various customisable options, including two bean options, and delivers high-quality hot drinks. Combining advanced technology with exceptional coffee, the K2FM features up to 25 pre-programmed drink configurations, making it the perfect solution for bustling commercial environments.

K2

Fresh Milk

K2 Fresh Milk

When it comes to fresh milk bean to cup coffee machines, the K2FM is a popular choice for businesses looking to deliver premium fresh milk beverages that are also cost-effective. Its contemporary and elegant design incorporates cutting-edge technology, ensuring consistent delivery of exceptional espresso with every use.

USER-FRIENDLY DESIGN

Personalise your hot beverage with ease using the K2FM's 10.1" Android colour touchscreen, which boasts a modern and user-friendly interface. The machine's intuitive design offers a range of options, including a choice of bean, ensuring that all tastes and preferences are catered for.

EASY TO MAINTAIN

The K2 Fresh Milk Coffee Machine is optimised for easy maintenance, featuring an automated cleaning system that activates each time the machine is switched on and off. This cleaning programme facilitates proactive maintenance, ensuring the machine is consistently primed for optimal performance and minimising any downtime. Additionally, the detachable hoppers located on top of the K2FM ensure an easy cleaning process, making it quick and convenient to maintain all components of the machine.

DUAL HOPPERS

With two bean hoppers, each with a 1kg capacity, you can offer two separate blends of coffee, ensuring a variety and catering to both light and dark roast lovers, or caffeinated and decaf. The K2FM also offers two ample powder hoppers for chocolate or plant based powdered milk.

INTEGRATED MILK FRIDGE

The 5-litre capacity integrated fridge features intelligent controls to keep milk at an optimum temperature, as well as level monitoring and automated cleaning when left unattended for 24 hours.

MODERN TECHNOLOGY

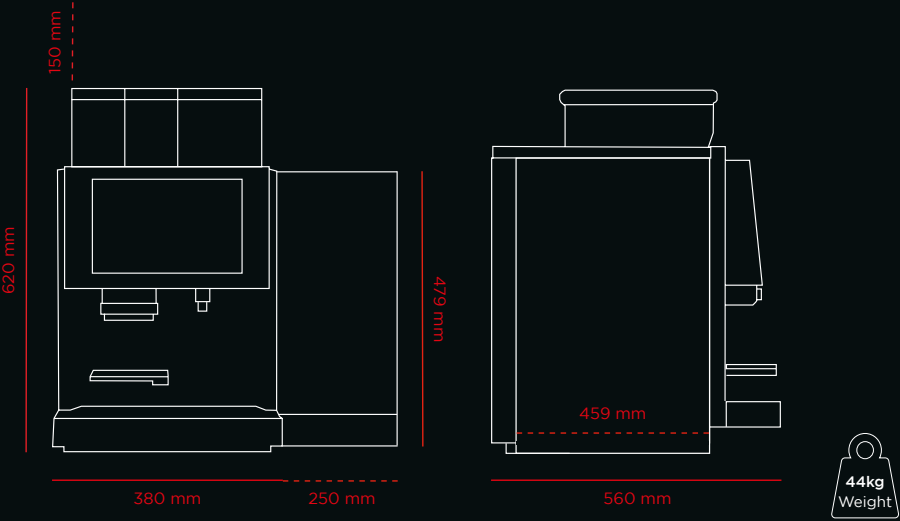

The K2FM boasts advanced features such as precise grinding, facilitated by its efficient flat burr grinder. It is complemented by a professional brewing system that achieves 9 bar extraction pressure and a 20% extraction rate. This machine seamlessly incorporates modern technology to elevate your coffee experience.

“

The K2 is truly a great addition to any space. It is incredibly easy to use and keep clean. With two bean hoppers, you can also offer fresh decaf coffee!”
