

# Borg & Overström E4

---

## Water Dispenser

An ultra compact, reliable and energy efficient water dispenser offering complete refreshment for high end commercial spaces.

# Borg & Overström

## E4

The Borg & Overström E4 is the ultimate advancement in high-quality water dispensing, offering both sustainability and superior performance. Whether you need freshly filtered chilled, ambient, sparkling, or hot water, the E4 can effortlessly fill water bottles, glasses and carafes with just a simple touch of a button.

### HIGH CAPACITY DISPENSE AREA

The E4 features an extra tall 290mm dispense area that is suitable for larger refillable water bottles and flasks, including the full Chilly's range and the Stanley Quencher.

### DRYCHILL COOLING SYSTEM

The E4 offers unrivalled performance with an innovative DryChill tankless system that cools water instantly. Complimented by a ProCore system with discreet ventilation and optimised chilling, the B4 delivers up to 200 cups of consistently chilled water per hour.

### SUPERIOR FILTRATION

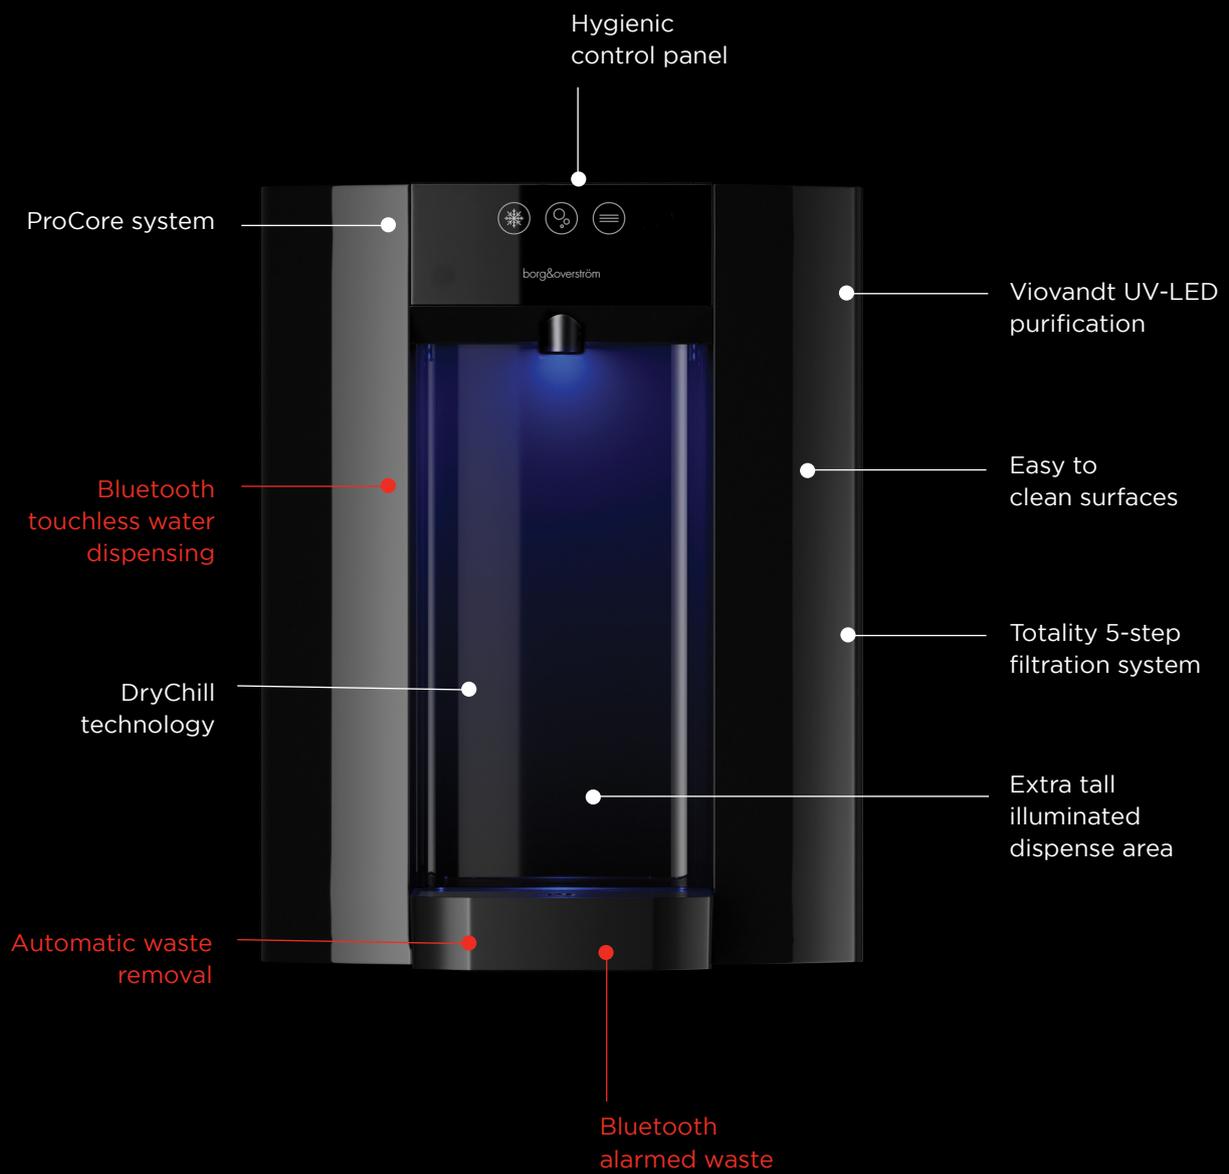

Borg & Overström's Totality 5-step filtering system effectively reduces sediment, chlorine and microplastics. The optional Viovandt water purification system then uses powerful UV-LEDs to inactivate harmful microorganisms, delivering pure, crisp, and hygienic premium water.

### PREMIUM AESTHETIC

Available in two colour options, with an optional base unit which transforms the desktop model into a freestanding water cooler.

“

Elevate your hydration experience and enjoy perfectly crisp, refreshing and hygienic drinking water every time.”
