

# Borg & Overström E6

## Water Dispenser

Revolutionising your drinking water experience, the Borg & Overström E6 incorporates innovative intelligent and eco-friendly technology, making this model the ideal solution for businesses looking to reduce their carbon footprint.

# Borg & Overström

## E6

Introducing the technologically advanced Borg & Overström E6 water dispenser, a sleek and stylish unit that provides instant chilled, ambient, sparkling and/ or hot water. Ideal for medium to large workplaces, the E6 delivers up to 50 litres of chilled or 15 litres of hot water per hour, ensuring convenience for your employees in preparing their preferred beverages.

### ADVANCED WATER PURITY

Experience the ultimate in water purification with Borg & Overström's Totality 5-step filtering system that effectively eliminates sediment, chlorine and microplastics. The optional Vivovand water purification system then takes this a step further, utilising powerful UV-LEDs to inactivate microorganisms, resulting in pure, crisp, and hygienic premium water.

### PREMIUM AESTHETIC

The E6 is available in two color options and offers an optional base unit for transforming the desktop model into a freestanding water cooler.

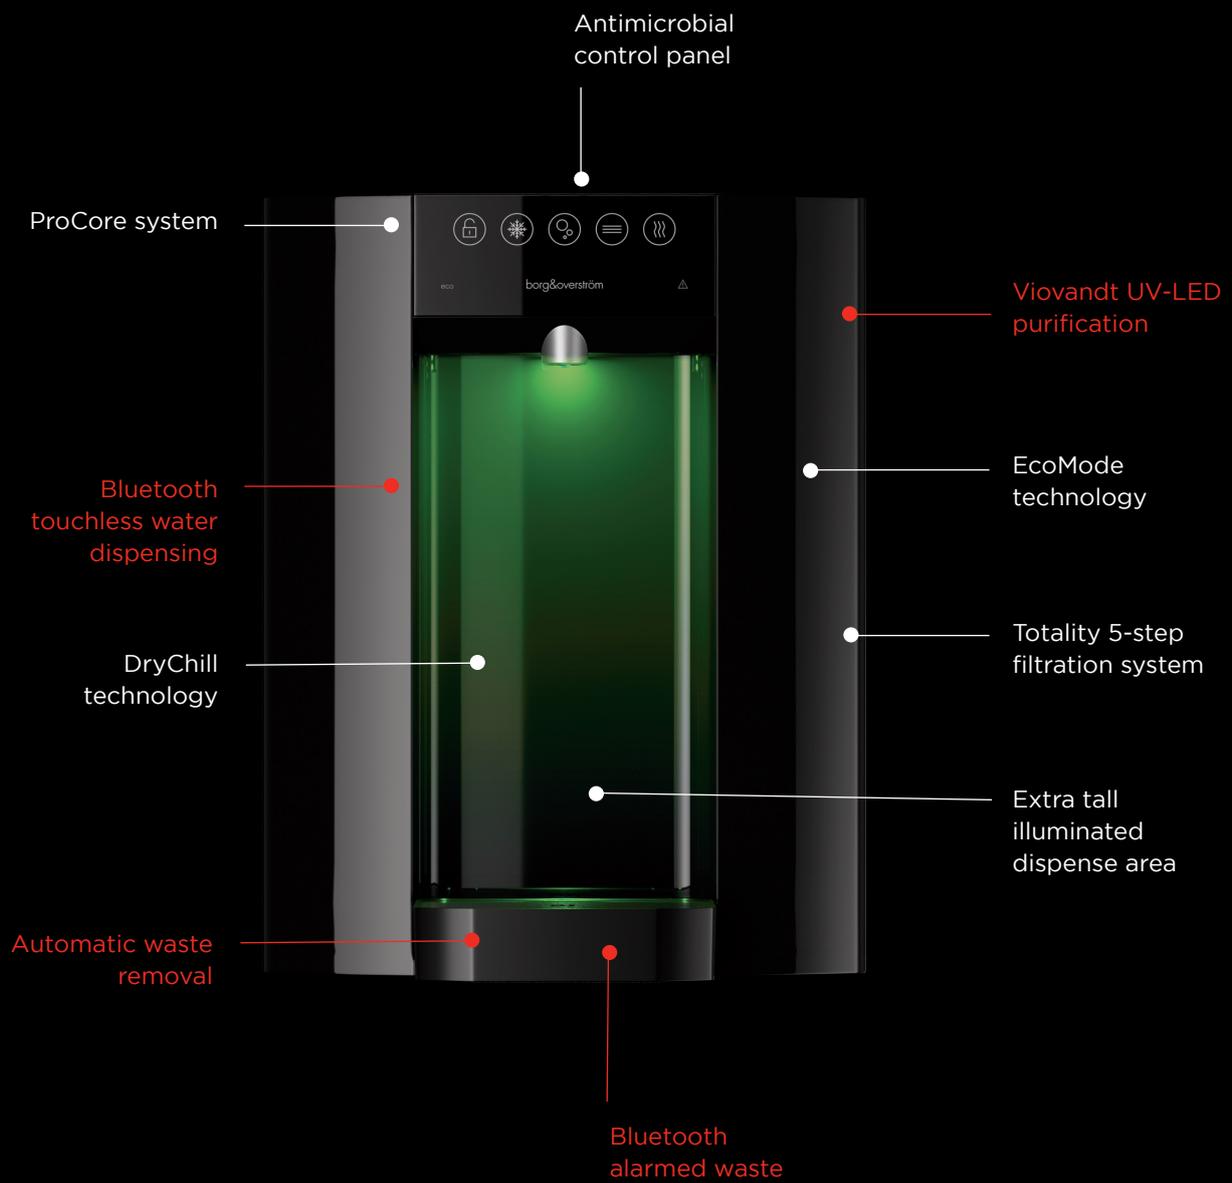

### ENVIRONMENTALLY CONSCIOUS

With a focus on sustainability, the E6 is assembled in the UK using environmentally friendly components. Its energy-efficient Dry Chill system and EcoMode technology surpass traditional water-cooling systems, and its recyclable parts contribute to its sustainability throughout its lifecycle.

### DRYCHILL COOLING SYSTEM

The E6 offers unparalleled performance with a groundbreaking DryChill tankless system that cools water instantly. Enhanced by the ProCore system, which includes discreet ventilation and optimised chilling, the B6 delivers up to 200 cups of consistently chilled water per hour.

“Evolved environmental sustainability, energy-efficiency and intelligent technology.”
