

Borg & Overström E7

Water Dispenser

The Borg & Overström E7 offers refined elegance, with freshly filtered chilled, ambient, sparkling, and hot water in one premium system. Sustainably made in the UK, it integrates cutting-edge touchless technology, eco-conscious features, and unparalleled hygiene assurance. Designed to elevate your workplace, the E7 is perfect for environments that value both sophistication and sustainability.

Borg & Overström E7

Borg & Overström E7

The Borg & Overström E7 seamlessly combines luxury with innovation. Equipped with SIMSecure connectivity, it offers real-time updates and maintenance alerts, ensuring uninterrupted performance. With EcoMode and energy-efficient ProCore® technology, the E7 promotes sustainability by reducing unnecessary energy consumption. Perfect for organisations aiming to meet environmental objectives without compromising on style or functionality.

ADVANCED WATER PURIFICATION

Featuring Borg & Overström's registered trademarked Totality® 5-step purification system, the E7 delivers clean, crisp water in every pour. This advanced filtration reduces sediment, chlorine, and microplastics, while optional Viovandt® UV-LED purification ensures chemical-free, hygienic water dispensing. Enjoy peace of mind with the E7's commitment to water purity and safety.

EFFORTLESS ELEGANCE AND USABILITY

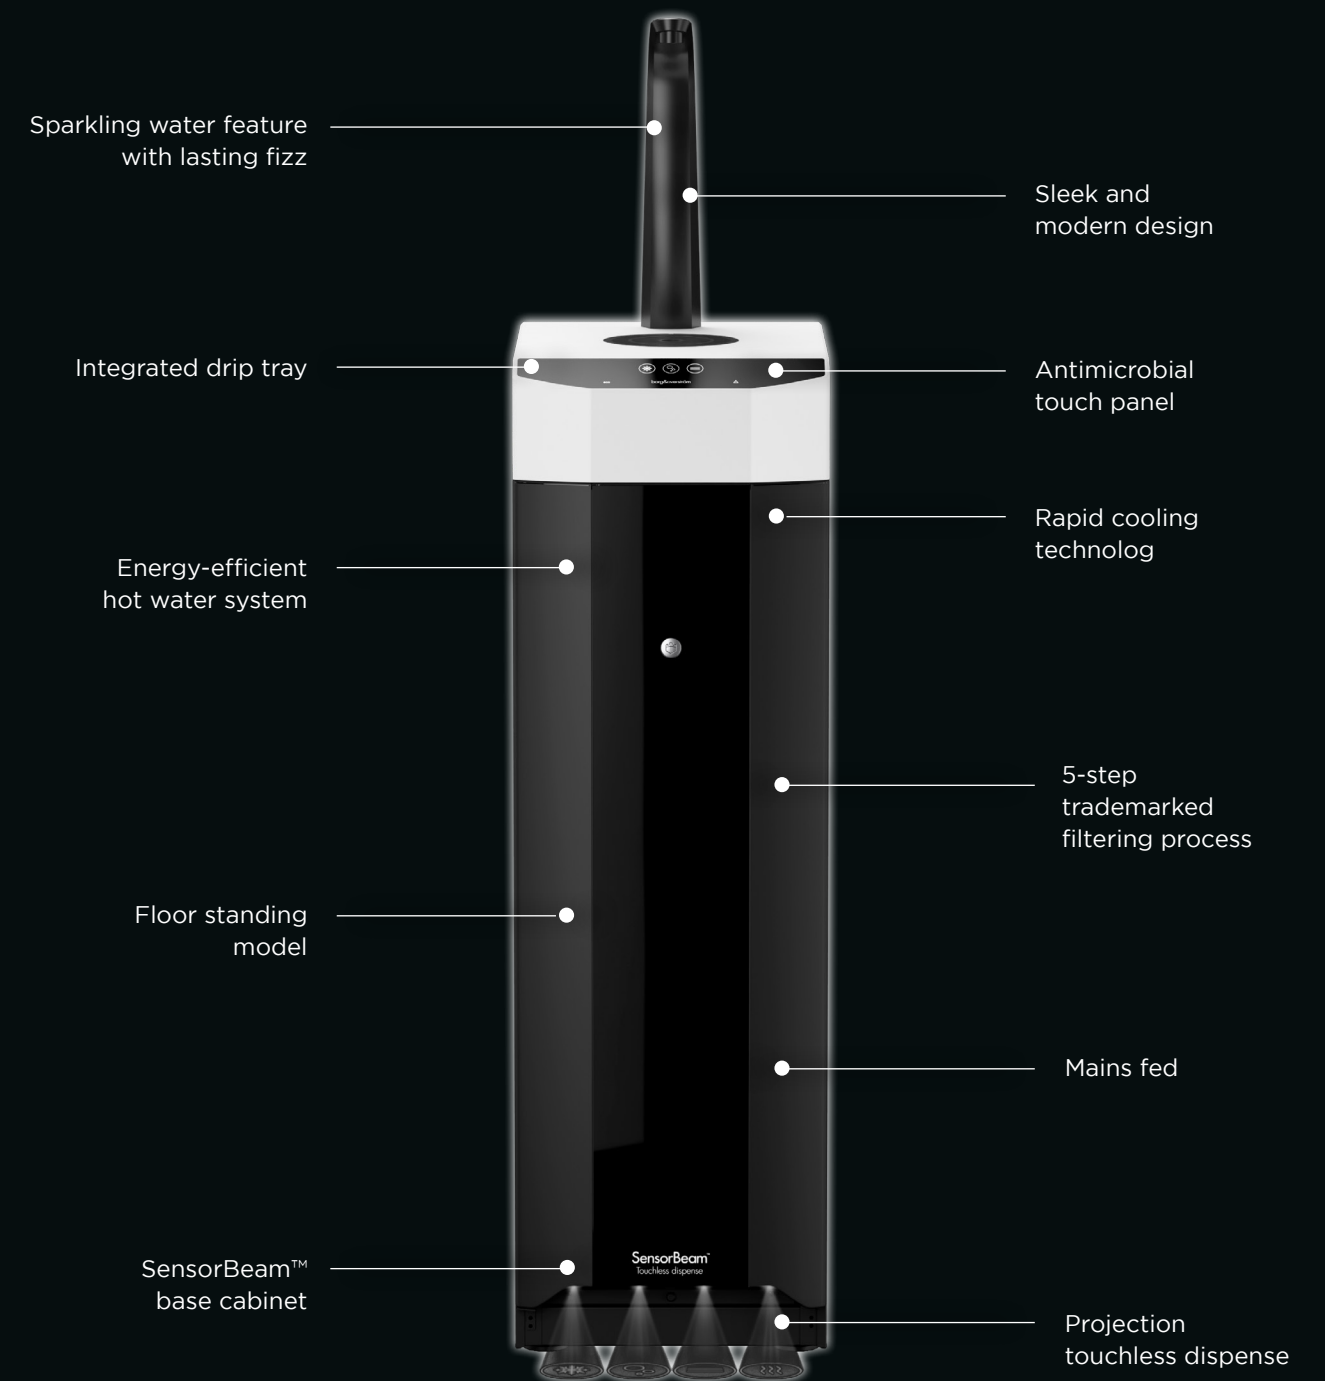

With an intuitive design, the E7 includes touch-free SensorBeam™ technology for hygienic dispensing and an antimicrobial touch panel to ensure a safe user experience. With its sleek Corian® top and illuminated base cabinet, the E7 combines luxury aesthetics with practical functionality.

ENERGY-EFFICIENT INNOVATION

The ProCore® modular system powers the E7 with unparalleled reliability and efficiency, while EcoMode ensures intelligent energy-saving by reducing energy usage during periods of inactivity. This energy-conscious approach minimises operating costs while supporting your environmental commitments.

QUICK AND HYGIENIC DISPENSING

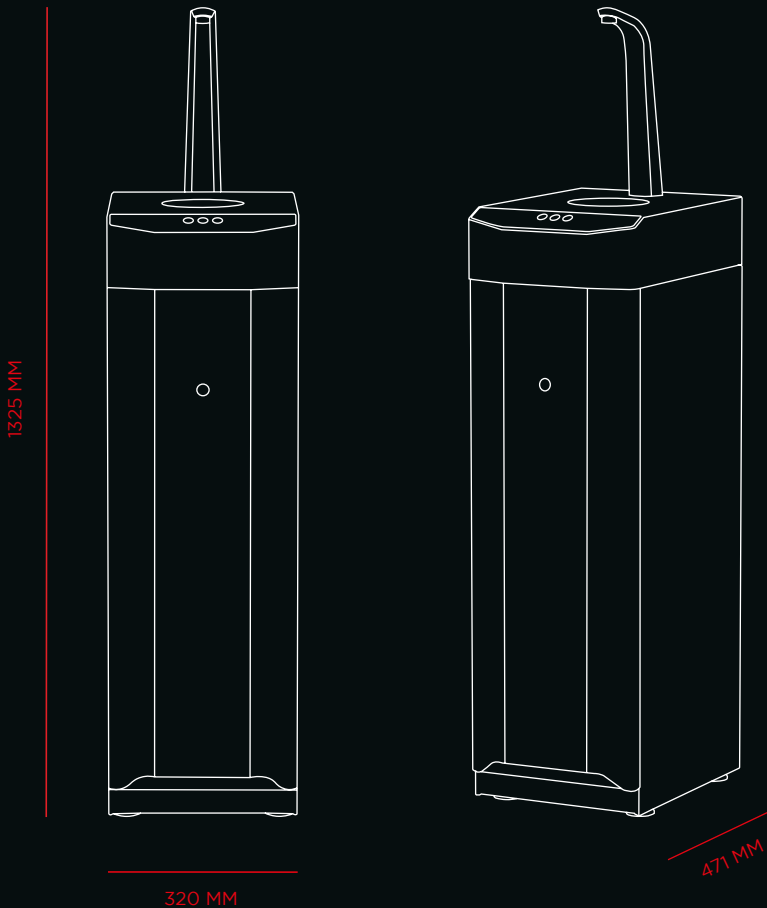

The E7 offers a completely touchless dispensing experience, elevating hygiene standards. Designed for maximum efficiency, the system's DryChill® rapid cooling technology ensures consistently chilled water with minimal energy consumption. Whether for small offices or large commercial spaces, the E7 is built for reliability and performance.

//

The Borg & Overström E7 redefines workplace hydration with its blend of intelligent technology, and eco-conscious design.”

Technical Information

Specification

Product ID	PBOE7
Capacity	Chilled and sparkling 50 litres per hour, hot 16 litres per hour
Drink Configurations	Chilled, Ambient, Sparkling and Hot.
Energy	230-240V
Water	Mains connected
Colour:	Black & White or Black & White LED-UV
Additional Features	Touchless dispensing
