

PUQ Press M6

Automatic Tamper

The PUQ Press M6 is an integrated automatic tamper designed to deliver consistent, perfectly level tamping while reducing strain and improving workflow in busy coffee bars. Installed directly beneath the grinder, it eliminates manual tamping and unnecessary movement. Built for high-volume environments, the M6 combines durability, precision and space-saving design to support faster service and reliable espresso quality throughout the day.

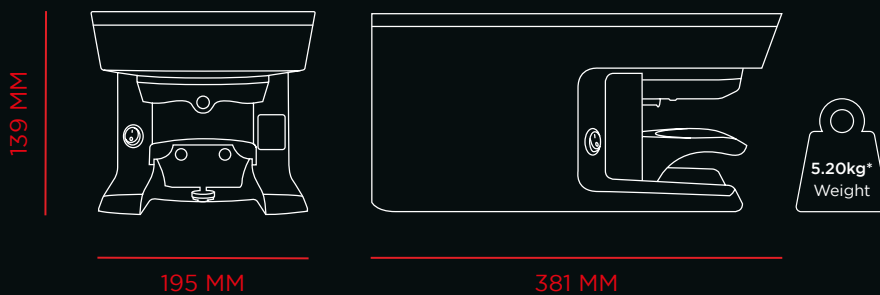

“

The PUQ Press M6 always delivers perfect tamping, ensuring consistency is built into every shot.”

PUQ Press M6
