

ZENSIA

COFFETEK

Hot Drinks

Vending Machine

Enjoy up to 700 cups of coffee shop style drinks per day, available in instant or bean to cup configurations.

The Zenisa hot drinks vending machine has it all! This high volume machine offers up to 17 different drinks selections, including speciality coffee, hot chocolate and fresh leaf tea. A minimalist and ergonomic design that's back lit with LED bulbs, the Zensia is attractive and eye-catching. It is also extremely simple to operate and maintain, with easy access to replace product and programmable filter change alerts.

A+ ENERGY RATING

The Zensia automatically lowers boiling temperatures during inactivity and can be programmed to shut down completely at night when out of use, reducing energy consumption significantly.

AUTOMATIC CUP DISPENSER

The Zensia includes an automatic cup dispense system that offers different drink sizes. The integrated sensor also allows you to use your own cup, reducing waste.

FRESH LEAF TEA

For lovers of a good old fashioned cuppa the Vitro Zen offers delicious tea prepared using fresh leaves for maximum flavour.

TOUCHLESS TECHNOLOGY

Benefit from a safer user experience with distance selection technology allowing users to select a drink by hovering their finger 2cm away from the machine.

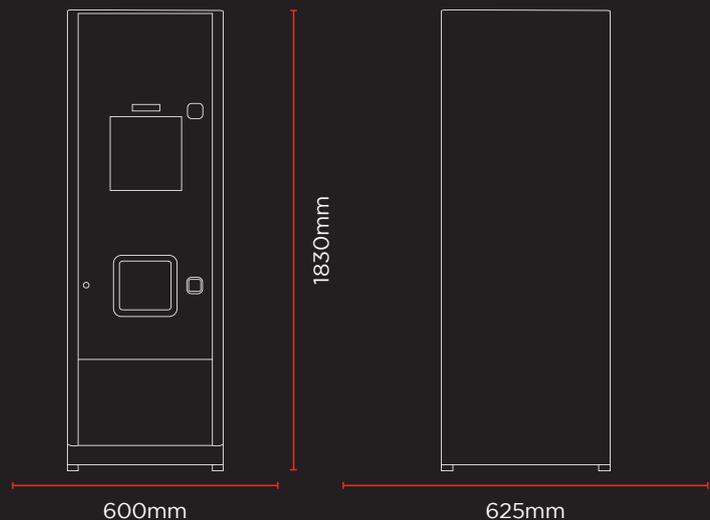

TOUCHLESS FEATURE

The Zensia's Distance Selection Technology allows users to select a drink of their choice without having contact with the surface of the machine. By simply hovering their finger over their desired selection on the screen, users can dispense their favourite drinks safely and hygienically.
